

Panorama.2 M-Kit

for the modernization of existing roller shutters

Panorama.2

10° wider opening angle
50% greater visibility

M-Kit

Roller shutter curtain
+ Guide rails
+ Motorized operation

The new generation
of the **roller shutter with tilting blinds**
in a **modernization kit**
with guide rails and motorized operation

Panorama 2. M-Kit

The **Panorama.2 modernization kit** allows you to replace existing roller shutters with a functional **roller shutter and sun protection system** featuring perfectly matched components.

To use the **new Panorama.2 curtain**, existing guide rails are replaced with **U-guides** or easily retrofitted using **slide-in guides**. The **Somfy RS100 io motor drive** with **radio transmitter** ensures maximum ease of use.

Panorama.2 roller shutter curtain

The **Panorama.2** is the new generation of **roller shutter with tilting blinds**. Thanks to the **10° larger opening angle** of the folding panels, it allows for **50% greater visibility**.

The **Panorama.2** allows plenty of **indirect daylight** to enter and ensures good **air circulation**. At the same time, it offers **high visibility** and **perfect sun protection**. Thanks to its robust material, it is **weather-resistant** and enhances **security**.

The optional **Panorama.2 Plus** curtain variant is also equipped with an **integrated insect screen**.

 The **combination** of winter **thermal insulation** from roller shutters with **protection from solar radiation** in summer ensures an **excellent thermal effect**.

U-FS or E-FS guide rails

The **modernization kit** includes the **U-FS 25x22** or **U-FS 32x22 guide rails**, which are suitable for replacement. If existing **guides for larger profiles** cannot be removed, they can be easily retrofitted using the **E-FS 33x16 slide-in guide rail**.

The guide rails are available in many **RAL colours**, allowing them to be perfectly matched to on-site components. Many other **guide rail designs** are also available.

Somfy RS100 io motorized operation

The **modern Somfy RS100 io radio-controlled motor drive** guarantees optimal operation of the **Panorama.2**. It features **two operating speeds**, allowing the curtain to be opened and closed smoothly.

Operation is convenient via **hand-held** or **wall-mounted transmitters**. Integration into the **Somfy TaHoma Switch smart home system** is also easily possible.

The **Somfy RS100 Hybrid io** motor variant can be connected to **wired switches** in addition to its wireless operation. If no mains power connection is available, the **Somfy RS100 Solar io** solar-powered drive with **battery and solar panel** is a suitable alternative.

Please note that the Panorama.2 roller shutter system does not provide total black out. Light reflections may occur even when fully closed, especially through the light and air openings.

Advantages

- Light and air intake
- Visibility and sun protection
- Weather resistance and security
- Optional insect protection
- Thermal effect
- Easy retrofitting
- Convenient operation

Roller shutter curtain

Measures:

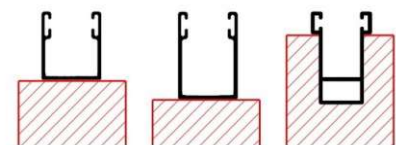

- profile dimensions 8 x 37 mm
- outward or inward rolling curtain
- min. width 40 cm
- max. width 250 cm
- max. area 6,25 sqm

Colours:

- anthracite, grey aluminium, natural light grey, white, bright beige
- special colours available upon request

+ Guide rails

U-FS 25x22 U-FS 32x22 E-FS 33x16

+ Motorized operation
